

Inverted vent check valve 1700 serie

Inverted Vent Check Valves protect tanks and bulkheads from pressure build-up during loading and unloading of liquid or dry cargo and assure maximum efficiency during operations. The ball float prevents contamination of the tank cargo by sea water during heavy seas. All steel castings are hot dipped galvanized.

All aluminum castings are anodized.

SPECIFICATIONS

**GALVANIZED STEEL /
ANODIZED ALUMINUM/
STAINLESS STEEL**

FLOAT MATERIAL

316 stainless steel (standard)

Copper

High density polyethylene

Monel

CONNECTIONS

Threaded

Buttweld

Socketweld

Flanged

Victaulic
