

Sickness Registration

FourVision's Web App for
Microsoft Dynamics 365 for Talent

All in one Web App for sickness registration and management

The Sickness Registration Web App from FourVision offers full sickness registration capabilities. All relevant data is captured and stored in this Web App, creating cases linked to individual employees regardless of location and enforcing local jurisdictional reporting requirements. Security permissions are enforced providing role-based access to managers and HR practitioners with insights via clear comprehensive sickness reports. The Sickness Management Web App is designed for any mobile device, tablet or computer.

SICKNESS REGISTRATION ID	SICKNESS CODE	STATUS	START DATE	ESTIMATED END DATE	END DATE	ACTION
1	001	Sick	01/09/2017	20/09/2017	20/09/2017	...
1	002	Recovered	01/08/2017	18/09/2017	19/09/2017	...

Checklists of actions

The FourVision Sickness Management Web App provides rich workflow capabilities allowing administrators of the application to easily configure workflows and create checklist with actions to be completed. Checklists are created and assigned automatically to each Sickness case. This includes the 'basic' information as well as the upload of medical certificates.

Sickness Registration Web App

Workflows

Workflows provide a simple method of uploading medical certificates which are linked to designated checklists after closing a Sickness case. The Web App supports a wide range of Sickness statistics including Sickness registration types and the number of individual cases. Workflows provide doctors with the ability to add data leveraging standard Dynamics 365 for Talent security protocols. The Web App also supports multiple sickness notifications linked to a single sickness case and records the number of days between each case.

Fully **integrated**

Integration between the FourVision Web Apps such as Timesheets and Leave & Absence saves even more time as sickness registrations are automatically recorded in employee timesheets registering sick leave the day(s) in the employees absence overview.

Key **takeaways**

- Simple sickness registration
- Generated checklists of actions to be completed
- Configurable action to be carried out per type of sickness
- Flexible and easily configurable workflow
- Multi-device access
- Connected to the Common Data Service
- GDPR Compliant
